Specialist*

To

Rick Brown

I have been contacted again by Texaco Inc. about their A.H. Blinebry NCT-2 #5-M 29-23-38 in the Tubb O&G Pool. The Tubb was reclassified as an oil well by SE-4780 effective 1/1/83. In Jan. 1987 it was appearing as a NC and we requested that it be removed. It stayed out of the gas schedule for several months, but in July 1987 it showed up again in the gas schedule as a NC. with overproduction. The well is listed in the oil proration schedule with an oil allowable in the Tubb.

Mr. Patterson with Texaco contacted me in November and I advised him to contact you and he said he did but was concerned that it appeared in the December schedule again. You may have already removed it again and if you have, please disregard this note.

Thank you,

Oil Conservation Division
