Attention: Mr. J. G. Blevins, Jr.

Gentlemen:

According to our records your A. H. Blinebry NCT-2 Well No. 5, Tubb Gas Pool, is shut in waiting on pipeline connection. However, we do have a C-110 which was submitted in May of 1960 which designates Warren as the transporter of gas. Also, I have before me a C-115 for February, 1961 which indicates that the well produced 195 barrels of oil and no gas.

Would you please clarify this, and if the well is producing it is being produced without authorization from this office.

The State of New Mexico "BN" NCT-1 Well No. 1 in the Moore Wolfcamp Gas Pool will be cleared for production upon receipt of a Notice of Connection from Texaco which will designate Texaco as the transporter. We realize that the gas produced from this well will be used for lease operation and fuel purposes, but it will be necessary that we have the Notice of Connection before all forms can be executed.

Yours very truly,

OIL CONSERVATION COMMISSION

Joe D. Ramey  
Proration Manager
