Re: Application to Dually Complete
Gulf Oil Corporation's Vivian
No. 1, Drinkard Pool, Lea County,
New Mexico.

Gentlemen:

By this letter of application, Gulf Oil Corporation wishes to state the following:

(a) That Gulf Oil Corporation's Vivian No. 1, located in the C NE/4 NW/4 of Section 30-22S-38E, was completed October 24, 1944 at a total depth of 6508'. The attached Exhibit "A" shows the location of this well on the Gulf Oil Corporation's Vivian Lease together with the location of all offset wells. The attached Exhibit "B" shows a diagrammatic sketch of the proposed dual completion.

(b) That subject well has 7" casing set at 6506' and cemented with 500 sacks of cement. The well is an oil well producing from the perforated interval 6375-6460' in the Drinkard Pool.

(c) That the applicant proposes to dually complete the well in the following manner:

1. Perforate the 7" casing within the interval 5970-6200' in the Tubb Gas Pool.
2. Set production type packer below these perforations at approximately 6325' to separate the two pay zones.
3. Produce the Drinkard Pool oil through the tubing and the Tubb gas through the tubing-casing annulus.

(d) That the granting of this application for permission to produce the well as a dual completion with gas from the Tubb and oil from the Drinkard is in the interest of conservation and the protection of correlative rights.

Therefore, Gulf Oil Corporation requests that the Oil Conservation Commission grant permission to the applicant to dually complete the subject well as proposed in this application.

I hereby certify that the information given above is true and complete to the best of my knowledge.

Respectfully submitted,
