Oil Conservation Commission  
State of New Mexico  
Santa Fe, New Mexico

Santa Fe, New Mexico  
Re: Application to dually complete Western Oilfields Inc. Drinkard #2, Drinkard  
Oil Pool, Lea County, New Mexico.

### Gentlement

Gentlemen:

By means of this application Western Oilfields Inc. wishes to state the following:

1. That Western Oilfields Inc. Drinkard #2 is located 1950 feet north of the south line, and 660 feet east of the west line of Sec. 30, T-22S, R-38E, Lea County, New Mexico. The Drinkard #2 well was originally drilled to T.D. of 6054' with 7" casing set at 5407' and 5" casing liner from 5377' to 6775'. A bridging plug was set at 6330' and perforations were affected 6060' to 6075' opposite the Tubbs gas pay, and Tubbs gas has been produced in this manner since 1952.

2. That the petitioner (Western Oilfields Inc.) will complete the well in the following described manner:

(Signed) \_\_\_\_\_, set the bridging plug set at 6330'.

- ing described manner.

  - A. Drill out the bridging plug set at 6230'.
  - B. Set Baker Model "D" Production packer at a depth of 6200 feet to segregate the producing zones.
  - C. Produce the Drinkard oil through 2" tubing from open hole section 6775' to 6954' and the Tubbs gas through the tubing casing annulus, from casing perforation 6060' to 6775'.

3. That the manner and method of dually completing, which is shown in the attached diagrammatic sketch marked Exhibit "A" is mechanically feasible and will prevent commingling of fluids and gases from the two reservoirs.

4. That notification has been sent to all operators directly or diagonally off setting the said Western Oilfields Drinkard Lease as required by New Mexico Oil Conservation Commission Rule 112-A for dual completions.

It is therefore respectfully requested that the Conservation Commission grant the applicant permission to finally complete the Brinkard #2 well in accordance with the rules and regulations of the Commission.

Respectfully submitted,  
Western Oilfields Inc.

bottoms well, extremely well, ~~and~~, ~~and~~

**Individual** self-report of health and self-rated mental well-being adds to research on how young self-report less well-being than older adults. In this study, "I feel I have no control over my life" was negatively associated with self-rated mental health. This finding is consistent with previous research showing that older adults report higher levels of self-efficacy and lower levels of depression and anxiety than younger adults (Lamb et al., 2005; Liao et al., 2006).
