AS REGARD PREVIOUS														

utions:

Using gas-oil ratio test, each well shall be produced at a rate not exceeding the top unit allowable for the pool in which it is located by more than 25 percent. Operator is encouraged to take advantage of this 25 percent tolerance in gas volumes must be reported in MCF measured at a pressure base of 15.025 psia and a temperature of 60° F. Gravity base will be 0.60.

Port casing pressure in lieu of tubing pressure for any well producing through casing.

I hereby certify that the above information is true and complete to the best of my knowledge and belief.
