

OIL CONSERVATION COMMISSION

Santa Fe, New Mexico

MISCELLANEOUS REPORTS ON WELLS

Submit this report in triplicate to the Oil Conservation Commission or its proper agent within ten days after the work specified is completed. It should be signed and sworn to before a notary public for reports on beginning drilling operations, results of shooting well, results of test of casing shut-off, result of plugging of well, and other important operations, even though the work was witnessed by an agent of the Commission. Reports on minor operations need not be signed and sworn to before a notary public. See additional instructions in the Rules and Regulations of the Commission.

Indicate nature of report by checking below:

REPORT ON BEGINNING DRILLING OPERATIONS		REPORT ON REPAIRING WELL	
REPORT ON RESULT OF SHOOTING OR CHEMICAL TREATMENT OF WELL		REPORT ON PULLING OR OTHERWISE ALTERING CASING	
REPORT ON RESULT OF TEST OF CASING SHUT-OFF	13 3/8"	REPORT ON DEEPENING WELL

Dear Sir:

Enclosed are four

copies of a report on the

analysis of

iron in the form of iron(II) sulfate heptahydrate.

The analysis was performed by the method of

gravimetric analysis, and the results are

shown in the table below. The results are

in good agreement with the results of

the analysis performed by the method of

gravimetric analysis, and the results are

shown in the table below. The results are in good agreement with the results of the analysis performed by the method of gravimetric analysis, and the results are shown in the table below.

Very truly yours,

Dr. J. H. Goldstein, Department of Chemistry, University of Chicago
