February 17, 1955

New Mexico Oil Conservation Commission
P. O. Box 871
Santa Fe, New Mexico

Gentlemen:

New Mexico Oil Conservation administrative Order No. DC 175 granted authority to dually complete Gulf Oil Corporation's T. R. Andrews No. 2 to produce oil from the Drinkard formation and gas from the Tubb formation.

The Drinkard formation has been found commercially unproductive in subject well. Therefore, it is requested that permission be granted to deviate from terms granted in Order DC 175 and permit the Gulf Oil Corporation to dually complete the well in the Blinbry and Tubb gas horizons after properly plugging the Drinkard zone. Proposed perforated intervals are from 6070' to 6110' and 6150' to 6275' in the Tubb and from 5580' to 5630' in the Blinbry.

Respectfully submitted,

C. F. Taylor

Area Superintendent of Production
