17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.) *

Remedial work has been performed to repair the collapsed casing as requested by form 9-331 approved October 29, 1974. An attempt was made to produce the Tubb Gas and South Paddock zones but due to uneconomical producing rates the well was shut in.

A study for remedial work to squeeze the Tubb and Paddock zones and recompleat in the Granite Wash is currently in progress. Remedial work is expected to commence in the latter part of 1976.
