(NOTE: Report results of multiple completion on Well Completion or Recompletion Report and Log form.)

17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.) *

To increase production we propose to do the following work on subject work:

1. Will temporarily abandon Blinebry Oil zone, and complete in the South Paddock oil zone. Kill well with inverted emulsion, and pull rods and tubing.
2. Run correlation log with collar locator 4930' to 5430', perforate Paddock Oil zone with one jet shot at approx. 5214', 5217', and 5223'.
3. Set retrievable bridge plug at approx. 5300' and packer at approx. 5175', acidize Paddock zone with 500 gallons 15% LSTNE.
4. Swab Paddock zone, and reacidize if required.
5. Remove bridge plug and packer, re-run Tubb zone tubing with Baker Model "K" at approx. 5250'.
6. Run 2 7/8" Hydril "CS" tubing (formerly the Blinebry zone tubing), spot inhibited brine water from model "K" packer to Paddock perforations and set tubing in model "K" packer.
7. Place Tubb and Paddock zones on production. (Blinebry oil zone temporarily abandoned)

18. I hereby certify that the foregoing is true and correct
