New Mexico Oil Conservation Commission
P. O. Box 871
Santa Fe, New Mexico

Gentlemen:

By letter dated May 8, 1959, Mr. R. F. Montgomery, Proration Manager, notified Texaco Inc. that it would be necessary to obtain a No Flare Order not later than July 1, 1959, for its A. H. Blinebry NCT-1, Well No. 8, in order to comply with Order R-553. This well is located in Unit E, Section 33, Township 22, Range 38, Blinebry Pool, Lea County, New Mexico.

According to the test made on May 26, 1959, this well is producing at a rate of 15 barrels of oil per day with a gas-oil ratio of 1,020 cubic feet per barrel, which results in 15.3 MCF of gas per day being flared. Pending completion of arrangements for the sale of the small amount of gas being flared from this well, Texaco Inc. respectfully requests a six-month exception to the No Flare Order R-553. We currently have under study the feasibility of constructing a small gasoline plant to handle gas production from leases in this area, and it will probably be six months before our study is complete.

Attached are three copies of a plat showing the well and tank battery location, offset ownership, and the location of existing gas gathering lines in the vicinity.

Yours very truly,

H. N. Wade
Petroleum Engineer
