## INSTRUCTIONS

This form shall be executed and filed in Oil ADR/PLATS Office of the Oil Conservation Commission when such unit produces oil or gas in payment of a unit's certificate. This certificate shall be used for oil or gas to be transported off the unit. After said certificate has been approved by the Oil Conservation Commission, one copy shall be forwarded to the Bureau of Oil Conservation, with production, and two copies retained by the Oil Conservation Commission.

A new certificate shall be filed to cover each change in production of each change in transportation, except that in the case of a unit which is a temporary transporter and less than the allowable production for one period, the operator shall, upon filing a new certificate, notify the Oil Conservation Commission District Office and the transporter authorized by permit of the Commission, by letter of the estimated amount of oil or gas to be moved by the transporter temporarily moving oil or gas from the unit and the name of the temporary transporter and a copy of such notice shall also be furnished to the transporter. Such temporary transporter shall not move any oil or gas in excess of the estimated amount shown in said notice.

This certificate when properly executed and approved by the Oil Conservation Commission shall constitute a permit for pipeline connection and for the transporter to transport oil and gas from the property named therein and shall be in full force and effect until:

- (a) The transporting ownership changes;
- (b) The transporter is changed; or
- (c) The permit is cancelled by the Commission.

If any of the rules and regulations of the Oil Conservation Commission have not been complied with at the same time this report is filed, report shall be filed with the heading "REMARKS."

In all cases when this certificate is filed to cover a change in production, it shall state the transporter designated to move oil or gas and shall be signed by the previous owner or operator and the transporter shall be authorized to transport oil or gas.

A separate report shall be filed to cover each production report filed by the Oil Conservation Commission.
