

## NEW MEXICO OIL CONSERVATION COMMISSION

Santa Fe, New Mexico

## MISCELLANEOUS REPORTS ON WELL

Submit this report in triplicate to the Oil Conservation Commission or its proper agent within ten days after the work specified is completed. It should be signed and sworn to before a notary public for reports on beginning drilling operations, results of shooting well, results of test of casing shut-offs, result of plugging of well, and other important operations, even though the work was witnessed by an agent of the commission. Reports on minor operations need not be signed and sworn to before a notary public. See additional instructions in the Rules and Regulations of the Commission.

Indicate nature of report by checking below:

REPORT ON BEGINNING DRILLING OPERATIONS		REPORT ON REPAIRING WELL	
REPORT ON RESULT OF SHOOTING OR CHEMICAL TREATMENT OF WELL		REPORT ON PULLING OR OTHERWISE ALTERING CASING	
REPORT ON RESULT OF TEST OF CASING SHUT-OFF	X	REPORT ON DEEPENING WELL	
REPORT ON RESULT OF PLUGGING OF WELL

Title

# Introduction

The purpose of this document is to provide a comprehensive overview of the project's objectives, scope, and deliverables. It serves as a reference for all stakeholders involved in the project.

The project is designed to address the following key areas:

- **Project Scope:** Define the boundaries of the project and the specific tasks to be completed.
- **Objectives:** Establish clear, measurable goals that the project aims to achieve.
- **Deliverables:** Identify the tangible outputs and results expected from the project.
- **Timeline:** Develop a detailed schedule for the project's duration.
- **Resources:** Allocate the necessary personnel, budget, and materials.

The project is structured into several phases, each with its own set of tasks and milestones.

- **Phase 1: Planning and Design**
  - Task 1.1: Conduct initial research and gather requirements.
  - Task 1.2: Develop a detailed project plan.
  - Task 1.3: Design the system architecture.
- **Phase 2: Development and Testing**
  - Task 2.1: Develop the software components.
  - Task 2.2: Perform unit testing and integration testing.
  - Task 2.3: Conduct user acceptance testing.
- **Phase 3: Deployment and Maintenance**
  - Task 3.1: Deploy the system to the production environment.
  - Task 3.2: Monitor system performance and address any issues.
  - Task 3.3: Provide ongoing support and maintenance.

The project team is composed of experts in various fields, including software development, project management, and system architecture. We are committed to delivering high-quality results on time and within budget.

For more information about the project, please contact the project manager at [email address].

We welcome your feedback and suggestions throughout the project. Your input is valuable to us.

Thank you for your interest in this project. We look forward to working with you.

Best regards,
