17. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work) SEE RULE 1103.

In December of 1967 a workover was initiated to increase low oil productivity in the Penrose-Skelly Grayburg. This reservoir was treated by superfracing with 14,000 gallons of oil and 32,500# of 20-40 sand. This attempt was unsuccessful and the well was temporarily abandoned on March 1, 1968. It is intended to plug and abandon this completion of New Mexico "S" State No. 24 in 1976.

Eff. 10/1/76

"The condition of the well is such as to prevent damage to the producing zone, migration of hydrocarbons or water, the contamination of fresh water or other natural resources, or the leakage of any substance at the surface."

18. I hereby certify that the information above is true and complete to the best of my knowledge and belief.
