17. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work) SEE RULE 1103.

In December of 1967 a workover was initiated to increase low oil productivity in the Penrose-Skelly Grayburg. This reservoir was treated by superfracing with 14,000 gallons of oil and 32,500# of 20-40 sand. This attempt was unsuccessful and the well was temporarily abandoned on March 1, 1968. It is intended to plug and abandon this completion of New Mexico "S" State No. 24 in 1975.
