Re: Application for Single Tubing-
less Completion, TEXACO Inc.
A. H. Blinsbry NCT-1 Well No.
29, Drinkard Pool, Lea County,
New Mexico

Attention: Mr. A. L. Foster, Jr.

Gentlemen:

TEXACO Inc. respectfully requests administrative approval of an exception to Statewide Rule 107(a) to authorize the tubingless completion of A. H. Blinsbry NCT-1 Well No. 29 in the Drinkard Pool. This well is located 560 feet from the north line and 1650 feet from the west line of Section 33, Township 22 South, Range 38 East, Lea County, New Mexico, this being a standard location.

Surface casing consists of 8 5/8 inch pipe set at 1350 feet in anhydrite and cemented to surface with 480 sacks of Lite Mate cement followed by 100 sacks of Class "C" neat cement. Production casing shall consist of 2 7/8 inch pipe set at total depth of approximately 7240 feet and is to be cemented with 750 sacks of Lite Mate cement followed by 500 sacks of Class "C", 4% gel, cement. The calculated cement volume equals 165% of the calculated annular volume from total depth to the base of the salt expected to occur at a depth of 2590 feet.

No corrosion or paraffin problems have been encountered in wells previously completed in this field. The New Mexico Oil Conservation Commission has previously authorized the tubingless completion of a well in the Drinkard Pool on the TEXACO Inc. W. L. Nix Well No. 4.

Yours very truly,

W. E. Morgan
