Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work) SEE RULE 1103.

We propose to isolate the Drinkard and Granite Wash perforations by using a retrievable bridge plug. Then perforate the Blinberry formation in the upper and middle sections, acidize & fracture stimulate as needed. We will produce from the Blinberry perforations until production declines to a point when we can commingle with the other two zones in this well with permission from the state in order #303-C downhole commingling.

I hereby certify that the information above is true and complete to the best of my knowledge and belief.
