Dear Sir:

This will confirm our conversation in Roswell concerning your Lou Wortham Well No. 6 located in Unit E of Section 11, T-22-S, R-37-E.

Based upon the initial potential, this is to advise that the well will be classified as a gas well in the South Eunice Oil Pool. The well will be carried in the Oil Proration Schedule in the South Eunice Pool and instead of an allowable, it will be designated as a gas well. Gas takes from the well will, of course, be limited daily to top pool allowable times the limiting GOR.

According to information I have received from Northern Natural Gas, you should be able to connect this well to Northern if it is classified as a gas well, regardless of whether it is in a gas or an oil pool.

Yours very truly,

OIL CONSERVATION COMMISSION
