17. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work) SEE RULE 1103.

This well was a dual Drinkard & Granite Wash producer; however, the Granite Wash production dropped to 2 BOPD and no gas. A retrievable plug was set at 7000' between the two zones, isolating the Granite Wash and producing from the Drinkard. We are currently evaluating the possibility of drilling the Granite Wash deeper in offset wells.

May we request an exception to permanently plug and abandon this formation pending further evaluation?
