Re: Elliott B-12-2 #3-E  
Section 12, T22S, R37E  
South Brunson-Drinkard/Abo and  
Wantz-Granite Wash Pools

Gentlemen:

DHC-698 was recently issued covering the downhole commingling of the South Brunson-Drinkard/Abo and Wantz-Granite Wash Pools in the above-referenced well. Today we received a gas/oil ratio test for the Drinkard zone. Since the allowable had been cancelled pending the approval of authority to downhole commingle, we cannot reinstate the allowable until you file a sundry notice covering work done to downhole commingle the zones and a commingled gas/oil ratio test (form C-116) broken down according to percentages set by DHC-698.

It is noted this is a "federal well", so a copy of the sundry notice filed with the BLM will be sufficient for our purposes.

Also, we are enclosing an example of a downhole commingled gas/oil ratio test for your information.

As soon as the sundry notice and the commingled gas/oil ratio test are received your allowable will be reinstated. If you have further questions, please contact Evelyn Downs at (505) 393-6161.

Very truly yours,

OIL CONSERVATION DIVISION

Jerry Sexton  
Supervisor, District I
