Re: Recompletion from Drinkard to Tubb
Downs B #3-D
Section 5, T22S, R37E

Dear Mr. Holder:

As requested in our November 1st letter it will be necessary for you to submit a C-104, Request for Allowable, and an acreage dedication plat, Form C-102, before we can approve an allowable for the Tubb completion in the above-referenced well.

A check of your October 1990 C-115 report indicates you are still reporting production from this well in the Drinkard Pool. You will need to amend these C-115 reports to show this production from the Tubb zone after the well was recompleted.

Unless these documents are filed immediately, a shutin order will be issued for this well.

Very truly yours,

OIL CONSERVATION DIVISION

Re: Downes B Well #3
Unit D, Sec. 5, T22S, R37E
Tubb Oil & Gas Pool

Gentlemen:

According to the recompletion report filed on Form C-105 for the above-referenced well it was recompleted from the Drinkard to the Tubb pool. In order that we may assign an allowable to the Tubb completion, please file Form C-104, Request for Allowable, and Form C-102, Acreage Dedication Plat for the Tubb pool. It does not have to be a surveyor's plat but the form must be signed by the operator and the dedicated acreage outlined.

If you have questions concerning this, please contact Evelyn Downs at (505) 393-6161.

Very truly yours,

OIL CONSERVATION DIVISION

Re: Recompletion from Drinkard to Tubb
Downes "B" #3-D Sec. 5, T22S, R37E

Gentlemen:

We have this date approved the recompletion of the above-referenced well from the Drinkard to the Tubb O&G Pool. However, this well cannot be produced from the Tubb if it is completed as a gas well until you have obtained approval of the unorthodox location.

Also, you must submit an acreage dedication plat for the Tubb dedicating 160 acres to the proposed gas well completion. If you have less than 160 acres to dedicate you will need approval of a non-standard proration unit.

Very truly yours,

OIL CONSERVATION DIVISION

Jerry Sexton
