Downhole Commingle Drinkard & Wantz Granite Wash -- DHC-884

Gentlemen:

We are returning your packer leakage test on the above-referenced well. You do have an approved downhole commingle order for this well so there will be no need for you to file packer leakage test.

I assume you have not removed the downhole separation equipment but you will need to file a C-116 (gas/oil ratio test) showing a combined test for both zones and allocating the production according to the allocation formula set out in the order so we can assign a downhole commingled allowable for this well.

If you have any questions, please contact Evelyn Downs or myself.

Very truly yours,

OIL CONSERVATION DIVISION

Jerry Sexton  
Supervisor, District I
