Re: Adobe Oil Company
"AA" Federal No. 1Y
1560' FNL & 1830' FWL Unit F,
Sec 10, T-23-S, R-34-E, Lea
County, New Mexico

*Amended Development Plan for Surface Used

Gentlemen:

As per instructions for submitting an application to drill onshore or offshore, gas or oil, or geothermal wells, on public domain and acquired lands, Adobe Oil Company answers these questions as follows:

1. Existing Roads: Exhibit "A", attached, shows existing roads in solid red lines.
2. Planned Access Roads: Will use existing road to our "AA" Federal No. 1 location which has been abandoned.
3. Location of Well: As shown on above referenced.
4. Lateral Roads to Location: None.
5. Location of Tank Battery and Flow Lines: If above well is productive surface equipment will be set on location site.
6. Location and Type of Water Lines: A water well will be drilled on location if a permit can be obtained. If not, water will be trucked from nearest water station that can sell water.
7. Methods for Handling Waste Deposits: A reserve pit located as per Exhibit "B" will be used for handling all wastes.
8. Location of Camps: None.
9. Location of Air Strips: None.
10. Position of the Rig, Mud Tanks, Reserve Pit, Pipe Racks, and etc.: Exhibit "B" shows the layout of the complete rig.
11. Plans for Restoration of the Surface: After drilling the well, Adobe Oil Company will level all pits and location as nearly to original ground level as possible.

*We filed development plan for our "AA" Federal No. 1 September 24, 1974 and this well had to be abandoned at 4143' due to junk in hole. This application is for a replacement well that will be drilled as shown.

If you have any questions concerning the above, please do not hesitate to call or write.

Yours very truly,

M. D. Rogers
Vice President
