Reclassify from Blinebry Oil and
Gas to Blinebry Gas

Dear Chris:

Please find attached your form C-116, a special GOR test to reclassify the Thomas Long A No. 2 & 3 from Blinebry Oil and Gas to Blinebry Gas. A 120 acres non-standard proration unit was approved February 8, 1999 for the Thomas Long A No.'s 1,2&3. Well No. 1¹ will not test as a Blinebry Gas well at the present time. The Thomas Long A #2¹ is shut-in and will be until remedial work results in a Blinebry Gas well.

A copy of Administration Order NSSP-1800(L)(SD) is also attached.

It would be appreciated if a 120 acre gas unit allowable could be assigned effective April 1, 1999.

Very truly yours,

A handwritten signature in black ink, reading "Ronnie H. Westbrook". The signature is written in a cursive, flowing style. The first name "Ronnie" is written with a large, prominent "R". The last name "Westbrook" is written in a more compact, cursive script.

Ronnie H. Westbrook
Vice-President

SPECIAL GOR TEST TO CONVERT FROM BLINEBRY OIL AND GAS TO BLINEBRY GAS. GOR IS ABOVE 50,000-1.															

Instructions:

During gas-oil ratio test, each well shall be produced at a rate not exceeding the top unit allowable for the pool in which well is located by more than 25 percent. Operator is encouraged to take advantage of this 25 percent tolerance in order that well can be assigned increased allowables when authorized by the Division.
Gas volumes must be reported in MCF measured at a pressure base of 15.025 psia and a temperature of 60° F.
Specific gravity base will be 0.60.
Report casing pressure in lieu of tubing pressure for any well producing through casing.

I hereby certify that the above information is true and complete to the best of my knowledge and belief.

Ronnie H. Westbrook
