SUNDRY NOTICES AND REPORTS ON WELLS

Do not use this form for proposals to drill or to deepen or reentry to a different reservoir.
Use "APPLICATION FOR PERMIT—" for such proposals

SUBMIT IN TRIPLICATE

1. Type of Well

☒ Oil Well ☐ Gas Well ☐ Other

2. Name of Operator

Euralex Operating Co

3. Address and Telephone No.

Box 94, Glade Park, CO 81523

4. Location of Well (Footage, Sec., T., R., M., or Survey Description)

330' FSL & 2310' FEL, Sec 30-T22S-R36E

5. Lease Designation and Serial No.

LC 630132 B

6. If Indian, Allottee or Tribe Name

N/A

7. If Unit or CA, Agreement Designation

N/A

8. Well Name and No.

Clossen B 20

9. API Well No.

300252526500

10. Field and Pool, or Exploratory Area

Jalmar Yates

11. County or Parish, State

Lea Co, NM

12. CHECK APPROPRIATE BOX(S) TO INDICATE NATURE OF NOTICE, REPORT, OR OTHER DATA

TYPE OF SUBMISSION

- ☐ Notice of Intent
☐ Subsequent Report
☐ Final Abandonment Notice

TYPE OF ACTION

- ☐ Abandonment
☐ Recompletion
☐ Plugging Back
☐ Casing Repair
☐ Altering Casing
☒ Other Test Log

- ☐ Change of Plans
☐ New Construction
☐ Non-Routine Fracturing
☐ Water Shut-Off
☐ Conversion to Injection
☐ Dispose Water

(Note: Report results of multiple completion on Well Completion or Recompletion Report and Log form.)

13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

Note: Well was pressure tested and approved for TA 4/19/94. CIBP @ 3535'
Intent to re-test csg.

1. Check FL & Bradenhead
2. Test csg to 500 psi for 30 min
3. Return to TA status
4. Work done within 60 days of approval

GENERAL INSTRUCTIONS

Instructions concerning the use of this form and the number of copies to be submitted, particularly with regard to local area, or regional procedures and practices, either are shown below or will be issued by, or may be obtained from, the local Federal and/or State office.

This form is designed for submitting proposals to perform certain well operations, and, if approved or accepted by any State, on all lands in such State, Federal and Indian lands pursuant to applicable Federal law and regulations, pursuant to applicable State law and regulations. Any necessary special in-

SPECIFIC INSTRUCTIONS

Item 4—If there are no applicable State requirements, locations on Federal or Indian land should be described in accordance with Federal requirements. Consult local State or Federal office for specific instructions.

Item 13—Proposals to abandon a well and subsequent reports of abandonment should include such special information as is required by local Federal and/or State offices. In addition, such proposals and reports should include reasons for the abandonment; data on any former or present productive

NOTICE

The Privacy Act of 1974 and the regulation in 43 CFR 2.48(d) provide that you be furnished the following information in connection with information required by this application.

AUTHORITY: 30 U.S.C. 181 et. seq., 351 et. seq., 25 U.S.C. et. seq.; 43 CFR 3160.

PRINCIPAL PURPOSE — The information is to be used to evaluate, when appropriate, approve applications, and report completion of secondary well operations, on a Federal or Indian lease.

ROUTINE USES:

(1) Evaluate the equipment and procedures used during the proposed or completed subsequent well operations.

(2) Request and grant approval to perform those actions covered by 43 CFR 3162.3-2(2).

(3) Analyze future applications to drill or modify operations in light of data obtained and methods used.

(4)(5) Information from the record and/or the record will be transferred to appropriate Federal, State, local or foreign agencies, when relevant to civil, criminal or regulatory investigations or prosecutions.

EFFECT OF NOT PROVIDING INFORMATION — Filing of this notice and report and disclosure of the information is mandatory once an oil or gas well is drilled.

The Paperwork Reduction Act of 1980 (44 U.S.C. 3501, et. seq.) requires us to inform you that: This information is being collected in order to evaluate proposed and/or completed subsequent well operations on Federal or Indian oil and gas leases.

This information will be used to report subsequent operations once work is completed and when requested, to obtain approval for subsequent operations not previously authorized.

Response to this request is mandatory for the specific types of activities specified in 43 CFR Part 3160.

BURDEN HOURS STATEMENT

Public reporting burden for this form is estimated to average 25 minutes per response, including the time for reviewing instructions, gathering and maintaining data, and completing and reviewing the form. Direct comments regarding the burden estimate or any other aspect of this form to U.S. Department of the Interior, Bureau of Land Management, (Alternate) Bureau Clearance Officer, (WO-771), 18 and C Streets, N.W., Washington, D.C. 20240, and the Office of Management and Budget, Paperwork Reduction Project (1004-0135), Washington, D.C. 20503.

Justification of Temporary Abandoned Status
Clossen "B" Well Numbers 3, 11, 16, 19, 20, 21 & 34
Lea County, New Mexico

The Clossen "B" lease currently has 15 active producers and one SWD. Euratex has tentative plans to install a water flood when economic conditions improve. The adjoining units immediately to the west, the Jalmat Yates Sand Unit and the Cone Jalmat Yates Unit, were previously under active water flood with apparent economical success. In fact, when these units were under active flood, the west line of wells on the Clossen "B" lease possibly experienced a small amount of offset flood response.

Euratex proposes to keep the seven wellbores as TA's for use in a possible water flood when economic conditions (oil price) improve. Currently the active producing wells and the seven wellbores under discussion which are not in use are in very good condition as are the surface facilities and can be used in any future water flood program. When Euratex purchased its interest in the property approximately 14 years ago in the time of the high oil prices (\$40/Bbl), outside engineers prepared a preliminary engineering report analyzing the water flood potential. This report forecast significant water flood reserves under the high oil price scenario. Unfortunately, when the oil prices fell, this potential became marginally economic where it rests today. Accordingly, Euratex proposes to keep the seven wells in question, once they have again demonstrated their mechanical integrity, in TA status until such time that a water flood of the Yates and associated sands becomes a bit better than marginally economic.
