RE: R. E. Cole (NCT-A) #17

This well has been under consideration for some time. We are researching what steps should be taken to return the well to production. Due to budgetary constraints, the workover will be done in the first quarter of 1999. A C-103 will be submitted stating our intentions for this well.

RE: SHUT IN WELLS

Gentlemen:

An Oil Conservation Division representative recently inspected the wells on the attached sheet. After further research of production data, these wells were found to not comply with OCD Order R-9210.

According to this rule, a well must not be shut in for more than 1 year. Within 90 days after the 1 year deadline, a proposal must be submitted stating the operators intentions of placing the well back into beneficial use. If the well is uneconomical to produce, it must properly be temporarily abandoned or plugged and abandoned according to OCD guidelines.

We request that you contact our office 24 hours prior to any repair work and/or testing. In reference to the plugging of any well, we request that you submit your proposal on a sundry C103 and contact us prior to the commencement of the plugging work.

If you have any questions regarding this matter, contact us at the number stated above.

Sincerely,

CHRIS WILLIAMS
District I Supervisor
