17. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work) SEE RULE 1103.

Notification was received from the Oil Conservation Division that a Packer Leakage Test was due on this well May 10, 1986. Marathon is unable to perform this test on this well. In April 1984, remedial work was undertaken on the upper completion, the Blinebry. A plug was set in the profile nipple at 7243', above the Baker Lok-set packer. A Baker RBP was also set at 5834', thereby shutting in the Wantz Granite Wash. The stimulation performed on the Blinebry proved successful so the Wantz Granite Wash was not re-activated. This well is a single Blinebry completion.

18. I hereby certify that the information above is true and complete to the best of my knowledge and belief.
