RE: Administrative Approval for Downhole
Commingling in Pan Cana Federal #1
in SW/4SW/4 of S6-T22-R37

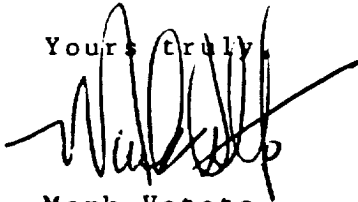

Gentlemen:

Me-Tex Supply Company has petitioned the Oil Conservation Commission for approval to downhole commingle the above well.

The well had reached an uneconomical point in the Drinkard and we have perforated the Tubb and lower Blinbry formations in hopes of increasing production.

This letter is just to let you know of our application.

Yours truly,

Mark Veteto
Vice-President
