RE: Administrative Approval for Downhole
Commingling in Pan Cana Federal #1
in SW/4SW/4 of S6-T22-R37

Gentlemen:

Me-Tex Supply Company has petitioned the Oil Conservation Commission for approval to downhole commingle the above well.

The well had reached an uneconomical point in the Drinkard and we have perforated the Tubb and lower Blinberry formations in hopes of increasing production.

This letter is just to let you know of our application.

Yours truly

A handwritten signature in black ink, appearing to read 'Mark Veteto', with a long horizontal stroke extending to the right.
