

MULTI-POINT SURFACE USE AND OPERATIONS PLAN

MARTINDALE PETROLEUM CORPORATION

WELL NO. 1 PANCANA FEDERAL

660' FSL and 990' FWL Sec. 6-22S-37E

Lea County, New Mexico

Lease New Mexico 1410

This plan is submitted with the Application for Permit to Drill the above described well. The purpose of the plan is to describe the location of the proposed well, the proposed construction activities and operations plan, the magnitude of necessary surface disturbance involved, and the procedures to be followed in rehabilitating the surface after completion of the operation so that a complete appraisal can be made of the environmental effects associated with the operation.

1. EXISTING ROADS:

- A. Exhibit "A" is a portion of a highway map showing the location of the proposed well as staked. From the intersection of State Road 176 and Loop 18 in the City of Eunice,  $2\frac{1}{2}$  miles south on Loop Road 18 to the Delaware Basin Road, west 3 miles, an improved road runs north 1.1 miles. The road runs along the west line of Section 7, T-22S, R-37E and to the proposed wellsite in Section 6.
- B. Exhibit "B" is a plat showing all existing roads within a one-mile radius of the wellsite, with an arrow indicating the planned access road.
- C. The planned access road will be an extension to the northeast of the road to the T.P. Elliott #1 and will be approximately 50 yards to the well location pad. The new road will consist of caliche surface 6 inches deep and 12 feet wide, watered and compacted.

2. PLANNED ACCESS ROADS:

- A. Length and Width: New road required will be 12 feet wide and 50 yards long. An arrow indicates this road on Exhibit "B".
- B. Surfacing Material: Six inches of caliche, water, compacted and graded.
- C. Maximum Grade: 3 percent.
- D. Turnouts: None required.
- E. Drainage Design: New road will have a drop of 6 inches from center line on each side.
- F. Culverts: None required.
- G. Cuts and Fills: None required.
- H. Gates, Cattleguards: None required.

3. LOCATION OF EXISTING WELLS:

- A. Location of existing wells within a one-mile radius are shown on Exhibit "B".

4. LOCATION OF EXISTING AND/OR PROPOSED FACILITIES:

If the well is productive the tank battery and flow line will be located on the well pad and no additional surface disturbance will occur.
