13 Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)\*

Last gas production was for February 1988 when the well was unable to buck El Paso Natural Gas Company line pressure. A study was made by J. W. Mulloy Associates in November 1987 and determined that there was approximately 2.5 BCF remaining reserves.

It has been determined that GPM Gas Corporation is considering a gas connection to a location approximately 1 mile distant. GPM has turned our request for a connection over to their engineering department.
