17. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work) SEE RULE 1103.

An attempt to recomplate this well in the Tubb was made in June of this year and proved to be unsuccessful.

On September 27, 1983 the Tubb perforations (5875 - 5972) were squeezed with 150 sx Class "H" cement. The cement was drilled out and the well is going to be a single completion Granite Wash. Last production from the Granite Wash was in May 1983, prior to the attempted Tubb completion.

The Granite Wash will be completed as before below a packer from 7175 - 7276'.

18. I hereby certify that the information above is true and complete to the best of my knowledge and belief.
