Attention Mr. Ray Cox

Re: Pool Nomenclature
State "EO" No. 1, Unit C
Section 26, T-23-S, R-34-E

Gentlemen:

Mr. John Runyan of this office has made a geologic study of the producing interval in the subject well by correlating the log for the well with the log for the Shell Oil Company Antelope Ridge Unit Well No. 2 located in Unit B of Section 4, T-24-S, R-34-E, which is designated by Division Order No. R-3050 as the type log to be used in determining the vertical limits of the Antelope Ridge Atoka and Antelope Ridge Morrow Gas Pools.

As a result of this study, it has been determined that the subject well is producing from the Morrow formation rather than the Atoka as shown on Form C-104, and that the well is actually in the Antelope Ridge Morrow Gas Pool rather than the Antelope Ridge Atoka.

Please correct your records to reflect this change in pool nomenclature, and Division records will also be corrected accordingly.

Yours very truly,

OIL CONSERVATION DIVISION
