Re: Reclassification of Well  
Jalmat Pool  
Closson B #24-I Sec 30, T22S, R36E

Dear Evelyn:

Per our conversation this morning, I have enclosed a SPECIAL (corrected) Gas-Oil Ratio Test (Form C-116) on the above well. After receiving the tests results from our pumper, I observed that the well did not produce any oil during the test on September 30, 1987. The report previously filed on October 7, 1987 showed oil production of 1 barrel. This is incorrect. Therefore, this well is to stay classified as a gas well. Please send me verification to this effect.

Thank you.

Sincerely,

  
Denise Bergin  
Production Clerk
