

Chloris cuculata, Bouteloua eriopoda, Andropogon sp., Eragrostis spp., and Cenchrus incertus.

Cultural Resources

No archaeological sites or isolated manifestations were recorded during this reconnaissance. Locally, the absence of cultural resources can be attributed to an overall lack of lithic inclusions in areal soils, a dearth of surface water, the presence of sheetwash, and remoteness from localities possessing these resources. Within this district, cultural resources tend to be concentrated in the vicinity of San Simon Ridge and similar features bordering San Simon Swales.

Recommendations

NMAS recommends clearance for Continental Oil Company's proposed Meyer A 29 Well No.10 and access road and suggests that work-related activities proceed in accordance with company plans.

Meyer B 31 A Well No.4

Location

This location will measure 400 X 400 ft on Federal lands and will be situated 660 ft from the north line and 660 ft from the east line of:

Section 31, T22S, R36E, NMPM, Lea County, NM

Thus it will be situated in the:

NE1/4NE1/4, Section 31, T22S, R36E, NMPM, Lea County, NM

The accompanying access road will measure 12 X 600 ft and will be situated in the:

NE1/4NE1/4, Section 31, T22S, R36E, NMPM, Lea County, NM
