*back up data
for 2nd testing
allowable*

Enclosed is C-104 requesting a testing allowable of 5500
bbls oil during the month of December 1984 for the Langley
Griffin #1, Section 28-22S-36E.

This second testing allowable is needed to swab and flow
the Strawn zone 9340-9362' in order to clean up the well
bore prior to running potential test for completion. The
testing allowable for November 1984 was not sufficient
because of a delay in producing well due to Bottom Hole
Pressure surveys, build up test and a failure in surface
production equipment.

Sincerely,

D. L. Shackelford
