RE: Williamson (Estoril Oil) #1 Curry Federal. 1980'FSL & 660' FEL of Section 22, T23S, R34E, Lea County, New Mexico.

I am at present in the process of moving in a rig to plug back this well below the production pay zone at 7222' to 7248" (Same pay as that in the Williamson #2 Curry State is producing from in the NW 1/2 of Section 22.

I intend to set a permanent plug deep enough below this section to have other attempts to produce in the Delaware Sands in this well but I am fairly confident that the zone we are opening will make commercial oil. The permanent plug will be deep enough to give us these chances and if we can find nothing the permanent plug can serve as a start for plugging the whole well.

We will be on this well before the deadline of the 6th of November and as soon as possible.

14. I hereby certify that the foregoing is true and correct
