RE: RECLASSIFICATION OF WELL
Tubb Oil & Gas
Drinkard NCT-B
#8-N, Sec.30, T-22S, R-38E

Gentlemen:

According to the recently submitted scheduled gas/oil ration test the above referenced well will be reclassified from an oil well to a gas well in the Tubb Oil & Gas Pool effective January 1, 1995.

If for some reason you feel this test does not reflect the proper classification of this well, please submit another test for our consideration by December 16, 1994.

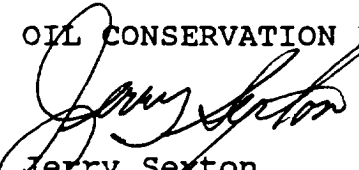

If the well is to be reclassified from an oil well to a gas well please submit the following:

- 1) Revised C-102 outlining acreage to be dedicated to Tubb Gas Proration Unit. If proration unit size or well location requires addition approval, please furnish order number approving same or copy of your application for approval on NSP and/or NSL.
- 2). C-104 showing reclassification from oil to gas and designating transporters of condensate and dry gas.
- 3). Also, statement that gas well gas is separately metered.

If you have questions concerning the above, please contact Donna Pitzer (505) 393-6161.

Very truly yours,

OIL CONSERVATION DIVISION
