Blinebry & South Brunson Drinkard/Abo -- DHC-874
J.L. MUNCY #6-1 Sec 24, T22S, R37E
Blinebry & Tubb Oil & Gas -- DHC-873

Gentlemen:

We have received the above-referenced downhole commingle orders and it is our understanding both these wells were being produced in a commingled state due to failure of downhole equipment.

In order to bring these wells into compliance with the downhole commingle orders, please file the following:

- 1) If any work has been done on the well such as removing separation equipment, etc. file C-103 so indicating.
- 2) File C-116, gas/oil ratio test -- allocating production to each zone according to the formula set out in each order.
- 3) C-104 indicating wells are downhole commingled and designating correct transporters. Our records for #6 show gas transporter for Blinebry to be Warren and for the Tubb it is Sid Richardson. Also, show DHC order on C-104.

If you have questions, please contact Evelyn Downs at (505) 393-6161.

Very truly yours,

OIL CONSERVATION DIVISION
