7. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work) SEE RULE 1103.

On the original C-101 we stated that we would set 350' of surface casing, and that we would circulate cement from the casing shoe of the production string to the surface. We would like to change these plans as follows:

1. Set 1470' of surface casing (8-5/8") to the top of the anhydrite and circulate the cement to the surface.
2. Instead of circulating the production string we would like to bring the cement back to the base of the salt (approximately 2800'.)

I hereby certify that the information above is true and complete to the best of my knowledge and belief.
