3. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

This disposal well was approved for disposal into the Delaware formation from approximately 4844' to 6160' by NM Administrative Order SWD-486 in August of 1994 (enclosed). The well was deepened to 5932' in 10/94 (see report) and salt water disposal has been ongoing since that date. However, a recent thru tubing check of the PBTB found the that there is approximately 725' of fill. Therefore, Harvard proposes the following:

Anticipated start date - February 27, 2003
Dig and line a working pit (30 x 80 x 10) and fence same
MIRU PU and reverse unit
Release pkr and TOH
PU 4 3/4" bit, drill collars and work string
TIH, clean out fill and deepen well to 6160'
TOH and LD bit, collars and work string
TIH w/ plastic coated injection string and nickel plated pkr
Circ hole w/ pkr fluid and set pkr at +/- 4780, test backside to over 500 psi for at least 20 minutes
Reclaim wokover pit and restore well to injection
