The Division's records indicate that the aforementioned State "A" A/C-3 Well No. 6 was plugged and abandoned in 1994; therefore, this well can now be omitted from this GPU.

It is our understanding that the subject well to be considered at this time was initially drilled to a total depth of 3,865 feet in December, 1999 in order to test the Langlie-Mattix-Seven Rivers-Queen-Grayburg Pool at standard oil well location within a 40-acre standard oil spacing and proration unit comprising the SW/4 SE/4 (Unit O) of Section 10. Found to be non-productive, Raptor now seeks to recomplete this well up-hole into the Jalmat Gas Pool upon issuance of this order.

By authority granted me under the provisions of Rule 2(d) of the *"Special Rules and Regulations for the Jalmat Gas Pool"*, as promulgated by Division Order No. R-8170, as amended, and Division Rule 104.F (2) the following described well located at an unorthodox Jalmat gas well location is hereby approved:

**State "A" A/C-3 Well No. 14
660' FSL & 1980' FEL (Unit O) of Section 10
(API No. 30-025-34682).**

Also, Raptor is hereby authorized to simultaneously dedicate Jalmat gas production from the State "A" A/C-3 Well No. 14 with the State "A" A/C-3 Com. "A" Wells No. 1, 2, 4, 5, and 8. Furthermore, Raptor is hereby permitted to produce the allowable assigned the subject 320-acre GPU from all six of the above-described wells in any proportion

All provisions applicable to the subject GPU in Division Order No. R-9073 and Division Administrative Orders NSL-2873 and NSL-2873-A shall remain in full force and affect until further notice.
