Westates Petroleum Corp. of Texas P. O. Box 1331 Jal, New Mexico

Re: Lease New Mexico 01917

Gentlemen:

Receipt is acknowledged of "Notice of Intention to Drill" dated April 11, 1957, covering your well No. 1 Weelley on the subject leasehold in the SESSE sec. 13, T. 24 S., R. 32 K., N.M.P.M., Wildont, Lea County, New Newloc.

Your proposed work is approved subject to compliance with the provisions of the "Oil and Gas Operating Regulations" revised May 25, 1952, copy of which will be furnished you on request, and subject to the following condition:

1. Drilling operations so authorized are subject to the attached sheet (revised Pebruary 1955) for general conditions of approval.

In accordance with our telephone conversation today, it will be satisfactory with is for you to set the 3 5/3" casing in red beds below the Santa Mosa formation rather than in the Anhydrite as orginally proposed.

Very trily yours,

CAL SHE H . C. Site over

H. A. DuPont District Engineer 24

DETAILS OF WORK

Wildeat Lea New Mexico (Field) (County or Subdivision) (State or Territory)

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cement-ing points, and all other important proposed work)

We propose to drill a well using rotary tools to approximately 4900! to test the Deleware Sand or to a point above or below 4900' to do so. The casing program will be to set 8 5/8" csg. at 850° or into the anhydrite formation circulating cement to the surface and to set 5 $1/2^n$ casing to the top of the Deleware Sand cementing back to the base of the salt. Gama-Ray Nuetron Log will be run from total depth b6 surface. Core will be taken to determine the production horizon and frac will be used to stimulate production if needed. State and Federal Regulations will be complied with.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
