(Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is 3098 ft. GL

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

It is intended to drill a well at the above location with rotary tools to a depth of 4565' in the Delaware Sand. Casing will be cemented in accordance with USGS regulations and other special requirements will be complied with.

The following casing program is planned: 7 5/8" OD set at 350' with 175 sx, cement to circulate to surface; 4 1/2" OD set at 4565' with 750 sx, cement to return to top of the salt.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
