The elevation of the derrick floor above sea level is 3092 ft. GL

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

It is intended to drill a well at the above location with rotary tools to a depth of 4565' in the Delaware sand. Casing will be cemented in accordance with USGS regulations and other special requirements will be complied with.

The following casing program is planned: 7 5/8" OD set at 350' with 175 sx, cement to circulate to surface; 4 1/2" OD set at 4565' with 800 sx, cement to return to top of salt.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
