DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

It is intended to drill a well at the above location with rotary tools to an approximate depth of 4500' in the Delaware Sand. Casing will be cemented in accordance with GSG regulations and other special requirements will be complied with.

The following casing program is planned: 8 1/2" OP set at 350' with 175 sx, cement to return to surface. Production string will be set if completion is attempted.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
