DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

It is proposed to drill this well with rotary tools at the above location to an estimated depth of 4000'.

Casing will be set in accordance with USGS regulations and other special requirements will be complied with. The following casing pattern is planned: 8 5/8" OP set at 1350' with approximately 650 sacks, cement to return to surface; 4 1/2" OP set at 4606' with approximately 175 sacks, cement to return to 4000'.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
