May 5, 1958

Well No. 1 is located 1980 ft. from N line and 1800 ft. from W line of sec. 8

N. Section 8 (1/4 Sec. and Sec. No.) 26 N (Twp.) 13 (Range) N.M.P.M. (Meridian)

Wildcat (Field) Lea (County or Subdivision) New Mexico (State or Territory)

The elevation of the derrick floor above sea level is _____ ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

We propose to drill this test with Rotary Tools from surface to total depth of 5200 feet unless commercial production of oil and/or gas, or an excessive amount of water in the Delaware Sand is encountered at a lesser depth.

We propose to cut a 11 inch hole to depth sufficient to permit setting 8-5/8" 24# casing through all possible surface waters. This string will be cemented with 200 sacks. We propose to cut a 7-7/8" hole below the 8-5/8" casing to total depth. A string of 5 1/2" 14# casing will be run to base of indicated pay section and will be cemented with enough cement to reach back into base of Castile Salt.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
