DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding ing points, and all other important proposed work)

It is intended to drill a well at the above location with rotary tools to a depth of 4740' in the Delaware Sand. Casing will be cemented in accordance with USGS regulations and other special requirements will be complied with.

The following casing program is planned: 7 5/8" OD set at 350' with 175 sacks, cement to circulate to surface; 4 1/2" OD set at 4740' with 175 sacks, cement to return to 4000'.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
