The elevation of the derrick floor above sea level is 3365 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

Set and cemented 1264' of 2-5/8" - 32# - 10 casing at 1276' with 550 sacks neat cement on 2-27-51 at 1:00 P.M. Cement circulated. After waiting 24 hrs, drilled out cement plug from 1250' (top of plug) to 1270' and tested casing on 2-28-51 at 6:00 P.M. with 1000 lbs. pressure. No pressure drop resulted in one hour. Drilled out remainder of plug to 1270' and again tested casing with 1000 lbs. pressure. A pressure drop of 50 lbs. resulted after 30 minutes. No formal notice of this test was filed; instead Mr. D. L. Clary personally notified Mr. J. B. Toyster of the intention to make the test.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.

Company Kan-Tex Corporation
