DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate raudding jobs, cementing points, and all other important proposed work)

Subject well is to be perforated from 3500 to 3600 with 4 jet shots per foot, a total of 80 shots. Following the perforating it is our intention to acidize with 2000 gallons of acid.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
